

# TRIBAL CLIMATE AND HEALTH ADAPTATION SUMMIT

*Getting to the heart of  
climate vulnerability*

## SAVE THE DATE!

**JULY 13-14, 2022 | PALA CASINO & SPA RESORT**

This two-day, in-person training will help arm up to 50 Tribal-serving professionals with the knowledge and skills needed to get to the heart of the unique climate and health vulnerabilities of the Tribes they serve, while also offering space for participants to attend to their own hearts through personal reflection and peer connection. The interactive training format will feature expert speakers, facilitated discussions, and hands-on learning activities to help deepen understanding of the effects of climate change on Tribal health and wellbeing. The summit will help practitioners ready their hearts and minds to develop well-informed vulnerability assessments that best reflect their community's concerns, culture, and aspirations and lead to most meaningful adaptation decisions.
